Section 16 Reports

Section 16(a) of the Exchange Act requires AVI's directors and officers, and persons who own more than ten percent (10%) of a registered class of AVI's equity securities, to file initial reports of ownership and report of changes in ownership with the Commission. Such persons also are required to furnish AVI with copies of all Section 16(a) reports they file.

Based solely on its review of the copies of such reports received by it with respect to fiscal year 2002, or written representations from certain reporting persons, AVI believes that all filing requirements applicable to its directors, officers and persons who own more than ten percent (10%) of a registered class of AVI's equity securities have been complied with for fiscal 2002.

Compensation Committee Report

Under rules established by the Securities and Exchange Commission (the "SEC"), the Company is required to provide certain data and information in regard to the compensation and benefits provided to the Company's Chief Executive Officer and the four other most highly compensated executive officers. In fulfillment of this requirement, the Compensation Committee has prepared the following report for inclusion in this Proxy Statement.

Compensation Philosophy. The Compensation Committee of the Board of Directors, which is responsible for reviewing and evaluating the compensation of the Company's executive officers, approves and recommends to the Board of Directors compensation and award levels for executive officers of the Company. With regard to compensation actions affecting Dr. Burger, all of the outside members of the Board of Directors act as the approving body.

The executive compensation program of the Company has been designed to:

Support a pay for performance policy that is tied to corporate and individual performance;

Motivate executive officers to achieve strategic business initiatives and reward them for their achievement;

Provide compensation opportunities which are comparable to those offered by similarly-sized biopharmaceutical companies; and

8

Align the interest of executives with the long-term interest of shareholders through award opportunities that can result in ownership of Common Stock.

Currently, the executive compensation program is comprised of a base salary and long-term incentive opportunities in the form of stock options, along with benefits offered to all employees of the Company.

Base Salaries. The base salaries of the Company's executive officers for 2001 were established effective January, 2001 as part of an annual compensation adjustment cycle. In establishing those salaries, the Compensation Committee considered information about salaries paid by companies of comparable size in the biopharmaceutical industry, individual performance, position, and internal comparability considerations. While all of these factors were considered, the Compensation Committee did not assign specific weights to any of these factors.

Stock Plans. The long-term, performance-based compensation of executive officers takes the form of option awards under the Company's 2002 Equity Incentive Plan ("2002 Plan"). The 2002 Plan replaced the Company's 1992 Stock Incentive Plan (the "1992 Plan"), which is designed to align a significant portion of the executive compensation program with long-term shareholder interests. The 2002 Plan, as did the 1992 Plan, permits the granting of several different types of stock-based awards. The Compensation Committee believes that equity-based compensation ensures that the Company's executive officers have a continuing stake in the long-term success of the Company. All options granted by the Company have been granted with an exercise price equal to the market price of the Company's Common Stock on the date of grant and, accordingly, will only have value if the Company's stock price increases. In granting options under the 2002 Plan, the Compensation Committee, as it also did under the 1992 Plan, generally takes into account each executive's responsibilities, relative position in the Company, past grants, and approximate grants to individuals in similar positions for companies of comparable size in the biopharmaceutical industry.

Executive Officer Compensation. In 1996, the Company entered into employment contracts with Drs. Burger and Weller and Mr. Timmins, in 1997, Dr. Iversen, and, in 2000, Dr. Mason and Mr. Webber, that provides for a base annual compensation. The employment contracts are cancelable by the employee on sixty days notice and by AVI on thirty days notice or for cause (as defined in the agreement); provided, the employee will receive severance pay of one year's base salary following either termination without cause or, following a change in control (as defined in the agreement), voluntary termination by the employee. In addition, the employment agreements prevent any of them from competing with the Company or soliciting the employment of other individuals employed by the Company during their employment and for a period of one year thereafter. Under the employment agreement, they may not disclose the Company's confidential information to outsiders during employment and for a period of two years thereafter, and assign inventions conceived by them to the Company.

In developing its recommendations regarding executive compensation, the Committee considered a number of factors, including analyses of compensation in similarly-sized companies in the biopharmaceutical industry, and analyses of compensation levels in similar companies in the Company's local geographic area.

The Audit Committee also discusses the results of the quarterly reviews and any other matters required to be communicated to the Audit Committee by the independent auditors under generally accepted auditing standards. The designated Chair of the Audit Committee represents the entire committee for the purposes of this review.
9. The Audit Committee reviews with management and the independent auditors the financial statements to be included in the Company's Annual Report on Form 10-K (or the annual report to stockholders if distributed prior to the filing of Form 10-K), including their judgment about the quality, not just acceptability, of accounting principles, the reasonableness of significant judgments, and the clarity of the disclosures in the financial statements. The Audit Committee also discusses the results of the annual audit and any other matters, or required communications to the Audit Committee by the independent auditors under generally accepted auditing standards.
10. The Audit Committee maintains free and open communication between the Audit Committee, directors who are not members of the Audit Committee, the Company's management, and the independent auditors.
11. The Board ensures the Audit Committee has adequate resources and authority to discharge its responsibilities and duties including the following:
 - a. The Audit Committee has full authority at its own discretion to institute investigations of any matter brought to its attention, with full access to all books, records, facilities and personnel of the Company, including standing authority to retain special counsel or experts.
 - b. The Audit Committee has the authority to review all aspects of the Company's financial operations on a planned basis.
 - c. The Audit Committee has the authority to review the Company's policies and procedures and the actual implementation of such policies and procedures with respect to officers' expenses and perquisites.
12. The Audit Committee reviews and assesses the adequacy of the audit committee charter annually with the Board of Directors as a whole. In addition, the Audit Committee reports to the Board of Directors any significant matters as they occur during the year.

CERTAIN TRANSACTIONS AND RELATIONSHIPS WITH AVI BIOPHARMA, INC.

In December 1999, the Company entered into an agreement with SuperGen, Inc. The president and chief executive officer of SuperGen, Inc., Joseph Rubinfeld, Ph.D., is a member of our Board of Directors. Denis R. Burger, Ph.D., the chief executive officer of the Company is a member of the Board of Directors of SuperGen, Inc. Under terms of the agreement, the Company acquired \$2.5 million cash and 100,000 shares of SuperGen, Inc. common stock, for one million shares of our common stock. SuperGen, Inc. also acquired exclusive negotiating rights for the United States market for Avicine, the Company's proprietary cancer vaccine currently in late-stage clinical testing against a variety of solid tumors.

In April 2000, the Company entered into an alliance with SuperGen, Inc. for shared development and marketing rights for Avicine. Under the terms of the agreement, AVI and SuperGen will equally share in future clinical development and FDA registration costs as well as in profits from product sales in the United States. At closing the Company received from SuperGen, Inc. \$5,000,000 in cash and 347,826 shares of SuperGen, Inc. common stock in exchange for 1,684,211 shares of AVI common stock and a warrant to purchase 1,665,878 shares of AVI common stock, subject to anti-dilution provisions. Closing of the transaction occurred during the third quarter of 2000.

Effective May 19, 1993, the Company and ANTI-GENE DEVELOPMENT GROUP, a limited partnership (AGDG or the Partnership) founded in 1981 and registered in the State of Oregon entered into a Technology Transfer Agreement wherein the Partnership conveyed all intellectual property in its control to the Company. As part of the conveyance, the Company tendered to the Partnership for liquidation all partnership units received pursuant to the exchange offer and received a 49.37 percent undivided interest in the intellectual property. The Company then purchased the remaining undivided interest in the intellectual property for rights to payments of 4.05 percent of gross revenues in excess of \$200 million, from sales of products, which would, in the absence of the Technology Transfer Agreement, infringe a valid claim under any patent transferred to the Company. The Company also granted to the Partnership a royalty-bearing license to make, use and sell small quantities of product derived from the intellectual property for research purposes only. This transaction is being reported, because at the time the original agreement was entered in 1993, certain then officers and/or directors, had and continue to have, an interest in AGDG.

In March 2000, the Company and AGDG amended the Technology Transfer Agreement to give to AGDG and Gene Tools LLC, related organizations, exclusive, non royalty-bearing rights to in vitro diagnostic applications of the intellectual property. In consideration for this amendment, Gene Tools paid the Company \$1 million and reduced the royalty that the Company would pay to AGDG under the Technology Transfer Agreement on future sales of therapeutic products from 4.05% to 3.00%. This transaction is being reported, because at the time the original agreement was entered in 1993, certain then officers and/or directors, had and continue to have, an interest in AGDG.

In December 2000, the Company loaned its chief executive officer, Denis R. Burger, Ph.D., \$500,000. The term of the loan was one year. The loan was secured by the chief executive officer's stock in AVI. Interest accrued at the rate of 8.5%. On January 3, 2002, the loan to the Company's chief executive officer was repaid in full with accrued interest.

During the year ended December 31, 2002, the Company paid Boston Healthcare Associates, Inc., of which director Andrew J. Ferrara is President, \$73,563 for business development consulting services. The Company expects to pay Mr. Ferrara, or his firm, for additional consulting services that may be performed for

the Company during 2003.

In June 2002, the Company loaned its chief executive officer, Denis R. Burger, Ph.D., \$500,000. The term of the loan is one year. The loan is secured by the chief executive officer's stock in AVI.

16

Interest on the loan accrues at the rate of 4.75% per annum. This loan was made prior to the Sarbanes-Oxley Act, which prohibits loans to executives, and therefore is grandfathered in.

In May 2001, the Company entered into an Investment Agreement with Medtronic International, Ltd, ("MIL," then known as Medtronic Asset Management, Inc.), a wholly-owned subsidiary of Medtronic, Inc. In June 2001, pursuant to the Investment Agreement, MIL purchased 1,408,451 shares of the Company's Common Stock and received a Warrant for 3,000,000 shares of such stock at an exercise price of \$10.00 per share and certain other purchase rights, based on agreed technology milestones being met or waived by MIL for an additional 352,113 shares of the Company's Common Stock at \$7.10 per share and, based on the market price at the time purchased, up to an additional \$7.5 million of such Common Stock. In June 2001, the parties entered into a related Registration Rights Agreement under which the Company agreed to register such shares for resale. In June 2001, the Company also entered into a License and Development Agreement and a Supply Agreement with Medtronic, Inc. The License and Development Agreement granted Medtronic, Inc. certain rights to develop and use the Company's NEUGENE technology for the treatment of restenosis in heart disease. The Company is to receive certain fixed payments and license fees if the technology is developed and commercially exploited by Medtronic, Inc. Under the Supply Agreement the Company agreed to manufacture the licensed product pursuant to a negotiated cost and pricing formula. Neither MIL nor Medtronic, Inc. was a related party as of the date of the stock purchases in June 2001, but became such as a result of such purchases.
