

Sarepta Therapeutics, Inc. Q2 2022 Earnings Conference Call

Forward Looking Statements

Tuesday, August 2, 2022 – 4:30 p.m. Eastern Time

In order to provide Sarepta's investors with an understanding of its current results and future prospects, forward-looking statements will be made during this conference call. Any statements made by Sarepta that are not statements of historical fact may be deemed to be forward-looking statements. Words such as "believe," "anticipate," "plan," "expect," "will," "may," "intend," "prepare," "look," "potential," "possible" and similar expressions are intended to identify forward-looking statements. These forward-looking statements include, without limitation, statements relating to our future operations, financial performance and projections, business plans, market opportunities, priorities, research and development programs, and the potential benefits of our product candidates; our full-year net product revenue guidance of between \$825 million and \$840 million and total revenue guidance of \$905 to \$920 million; our cash runway extending into 2024; the potential for SRP-5051 to be a profound improvement over the current standard of care; the potentially transformative benefits of SRP-9001 and the probability of success of EMBARK; and expected timelines, plans and milestones, including that we intend to submit a BLA for accelerated approval of SRP-9001 to treat ambulatory patients this fall and if an advisory committee is requested by the FDA, our expectation that the meeting would occur in the spring of 2023, and if the review of the BLA application is successful, our expectation for an approval and launch of SRP-9001 in 2023, completing enrollment for EMBARK in the next few weeks, using EMBARK as our confirmatory trial and our expectation that EMBARK will be fully enrolled by the time we file our BLA, dosing an additional cohort in Study 103 to study what our research informs us are low risk mutations in the currently excluded 1 through 17 range with a goal to narrow the exclusions to a low single digit percentage of the population by accelerated approval, initiating a separate placebo-controlled non-ambulatory study later this year for Study 303 (ENVISION), completing enrollment for MOMENTUM Part B in the second half of 2022, and further building out our manufacturing capacity and commercial infrastructure so that we are prepared to serve the maximum number of patients with SRP-9001, if approved by the middle of 2023.

These forward-looking statements involve risks and uncertainties, many of which are beyond our control. Actual results could materially differ from those stated or implied by these forward-looking statements as a result of such risks and uncertainties. Known risk factors include the following: we may not be able to meet expectations with respect to sales of our products or attain the anticipated net revenues, profitability or positive cash-flow from operations; we may not be able to comply with all FDA post-approval commitments and requirements with respect to our products in a timely manner or at all; the possible impact of regulations and regulatory decisions by the FDA and other regulatory agencies on our business, as well as the development of our product candidates and our financial and contractual obligations; our dependence on certain manufacturers to produce our products and product candidates, including any inability on our part to accurately anticipate product demand and timely secure manufacturing capacity to meet product demand, may impair the availability of product to successfully support various programs; our data for SRP-5051, SRP-9001, the LGMD programs, including SRP-9003, and/or other programs may not be sufficient for obtaining regulatory approval; success in preclinical and clinical trials, especially if based on a small patient sample, does not ensure that later clinical trials will be successful, and the results of future research may not be consistent with past positive results or may fail to meet regulatory approval requirements for the safety and efficacy of product candidates; the commencement and completion of our clinical trials and announcement of results may be delayed or prevented for a number of reasons, including, among others, denial by the regulatory agencies of permission to proceed with our clinical trials, or placement of a clinical trial on hold, challenges in identifying, recruiting, enrolling and retaining patients to participate in clinical trials and inadequate quantity or quality of supplies of a product candidate or other materials necessary to conduct clinical trials; different methodologies, assumptions and applications we use to assess particular safety or efficacy parameters may yield different statistical results, and even if we believe the data collected from clinical trials of our product candidates are positive, these data may not be sufficient to support approval by the FDA or other global regulatory authorities; if the actual number of patients living with the diseases we aim to treat is smaller than estimated, our revenue and ability to achieve profitability may be adversely affected; we may not be able to execute on our business plans, including meeting our expected or planned regulatory milestones and timelines, research and clinical development plans, and bringing our product candidates to market, for various reasons, many of which may be outside of our control, including possible limitations of company financial and other resources, manufacturing limitations that may not be anticipated or resolved for in a timely manner, regulatory, court or agency decisions, such as decisions by the United States Patent and Trademark Office with respect to patents that cover our product candidates, and the ongoing COVID-19 pandemic; and those risks identified under the heading "Risk Factors" in our most recent Annual Report on Form 10-K for the year ended December 31, 2021 and most recent Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission (SEC) as well as other SEC filings made by the Company which you are encouraged to review.

Any of the foregoing risks could materially and adversely affect the Company's business, results of operations and the trading price of Sarepta's common stock. You should not place undue reliance on forward-looking statements. Sarepta does not undertake any obligation to publicly update its forward-looking statements based on events or circumstances after the date hereof, except to the extent required by applicable law or SEC rules.
